TECHNICAL SKILLS

- Front-End
 - HTML, CSS, JavaScript
 - Vue.js
 - React.js
 - TypeScript
 - UI Libraries: Tailwind, Bootstrap, shadcn/ui, Material-UI, Quasar
- AI & Automation
 - AI-Assisted Dev: Claude Code, Codex, Cursor
 - Custom skills, agents, and rules for AI coding workflows
 - MCP usage: Stripe, ClickUp (drive real tasks from chat)
 - Workflows & RAG: n8n RAG chat (Gemini embeddings + OpenAI replies), PaperclipAI multi-model pipelines
 - Prompt engineering, agent orchestration, and AI-augmented development
- Backend
 - Google Cloud Platform: Cloud Functions, Firebase, Cloud Storage, Job Scheduler, APIs
 - Python
- Integrations
 - Payment Gateways: eWAY, Stripe, Square
 - Analytics & Tracking: Google Analytics, Microsoft Clarity, Facebook Pixel & CAPI, Reddit Pixel
 - Google Maps
- Others
 - Git
 - API integration
 - CI/CD: GitHub Actions, Bitbucket Pipelines
 - Linux commands
 - Design tools: Figma, Adobe Photoshop, Adobe XD

PROFESSIONAL EXPERIENCE

Telecommunications Service Provider - *Lead Front-End*

Aug 2024 - Present

- Built and maintained web and mobile apps using the Quasar framework, a Vue.js-based framework, turning Figma designs into clean, responsive UIs.
- Collaborated closely with backend developers to plan and implement scalable, well-structured solutions.
- Worked hand-in-hand with the project manager to scope out features, prioritize tasks, and troubleshoot bugs.
- Implemented Google Maps API for location-based services and integrated Google Tags and Analytics for performance tracking.
- Reviewed pull requests, ensuring code quality, consistency, and adherence to best practices.
- Mentored a junior developer through pair programming and knowledge sharing, providing guidance to improve code quality and overall skill development.
- Introduced AI-augmented workflows using Claude Code, Codex, and custom MCP integrations to accelerate development and code review.

SendAMessage - *Full Stack Developer* - June 2022 - Aug 2024

- Employed Vue 3 and Bootstrap-vue for the frontend, while utilizing Google Services (Cloud Functions, Cloud Storage, and Firebase RealTime Database) for the backend. Ubuntu for the app server. CI/CD using Github actions.
- As a solo developer, I collaborated closely with the client to implement features.

Freelance Web Developer

- **Spondise - *Lead Front-End Developer*** - Jan 2023 - Sep 2023
 - Implemented frontend using Nuxt 3.
 - Conducted code reviews and provided constructive feedback to peers to ensure code quality.
 - Delegated tasks to peers and addressed any questions or issues that arose.
 - Collaborated closely with UI/UX designers and CEO to implement pixel-perfect designs and seamless user experience.
- **CliniqApps - *Front-End Developer*** - Nov 2021 - June 2022
 - Developed the frontend using Vue 2 & jQuery.
- **MetaFox - *Front-End Developer*** - Feb 2021 - Oct 2021
 - Developed the frontend using Vue 2 and TailWind.
 - Assisted the senior developer in implementing GraphQL, and backend using Express.js.
 - Collaborated with the UI/UX designer and CEO for seamless user experience.
- **VoicelsKing - *Frontend Developer*** - Oct 2020 - Feb 2021

- Collaborated closely with the senior developer in creating form widgets that are integrated to clients' websites.
- Implemented form widgets using Vue 2, and SCSS with BEM.
- Integrated Google Map API to some of the widgets.

Innovuze Solutions, Inc - Web Developer - June 2019 - October 2020

- Developed a parametric search web app using Vue 2.
- WordPress development.

Freelance Web Developer - Web Developer - January 2019 - June 2019

- WordPress development with Divi Theme Builder.

NexusBond Asia, Inc - Junior DevOps - March 2018 - January 2019

- Managing, migrating, and deploying, digitalocean Linux servers and DNS.
- Setting up basic WordPress site, FTP user, mail server using iRedMail, and SSL certificate.
- Writing Ansible scripts to automate tasks.
- WordPress development.

EDUCATION

Bachelor of Science in Computer Science

Xavier University - Ateneo de Cagayan *June 2014 - March 2018*
